JAYAVEL K

Software Test Engineer

Mobile: 9597445510 | jayavelvel1998@gmail.com | LinkedIn: Jayavel Kandhasamy

PROFILE

Aspiring QA professional with experience in functional, regression, and API testing across web and mobile applications. Skilled in building automated test suites with Selenium WebDriver and Cucumber (BDD), and committed to continuous learning and delivering high-quality software.

EXPERIENCE

Cyrino India **Mar 2025 – Present**

QA Automation Engineer — Enterprise Management System (CEC)

- Test an onboarding platform that streamlines the hiring process for employees and schools, covering automated workflows for employee onboarding, leave management, and salary processing, as well as school budgets, programs, and student records.
- Review software requirement specifications and translate them into structured test scenarios and test cases.
- Analyze user stories and define test scenarios based on acceptance criteria, working closely with cross-functional teams.
- Build and maintain automated test scripts using Playwright to expand regression coverage.
- Develop reusable test components and procedures to improve team productivity and long-term test maintainability.

ABN Consultancy Service **Dec 2022 – Feb 2025**

Junior Test Engineer — Uniform & Laundry Management (We One)

Warehouse Management System (AlFahim)

- Tested application functionality across web and mobile platforms for client projects, working directly within client environments to complete required testing activities.
- Created and executed test cases and test scenarios based on application functionality and business requirements.
- Verified API requests and responses from the development team using Postman and Rest Assured, including APIs for employee uniform data that integrated with the We One mobile application.
- Developed automation scripts in Selenium for functional testing and retested defects following developer fixes.
- Performed regression, functional, smoke, and sanity testing; logged defects and maintained test reports in Azure DevOps and Git.
- Develop reusable test components and procedures to improve team productivity and long-term test maintainability.
- Operated within Agile and Waterfall project environments, supporting continuous integration efforts.
- Performed functional quality checks on application features and supported early-stage test documentation practices.

EDUCATION

Bachelor of Engineering **2020**

Jeppiaar Maamallan Engineering College

SKILLS

Languages: Core Java, SQL, JavaScript
Testing Frameworks: Selenium, Junit, Selenium WebDriver, Cucumber (BDD), Playwright
API Tools: Postman, Rest Assured
Defect & Version Management: Azure DevOps, Git
CI/CD & Other Tools: Jenkins, Maven, JMeter, Azure server hosting & CI/CD pipelines, GenAI
Methodologies & Practices: Agile, SDLC, STLC, Test Case Preparation, Defect Tracking, Knowledge Transfer
