Jayavel K

Professional Summary

- **Junior Quality Engineer** with 3+ years of experience in Manual and Automation Testing across web and mobile applications. Strong expertise in functional, regression, and API testing.
- Hands-on experience in Playwright (TypeScript, Mocha), Selenium WebDriver (Java, Cucumber BDD), REST Assured, and Postman**.** Skilled in building scalable automation frameworks using Page Object Model (POM).
- Experienced in SQL (MSSQL), CI/CD pipelines (Jenkins, Azure DevOps), and Agile methodologies. Focused on delivering high-quality, reliable software through efficient testing strategies.

Core Skills

- Manual Testing
- Automation Testing (Playwright, Selenium WebDriver)
- API Testing (Postman, REST Assured)
- Java
- TypeScript / JavaScript
- SQL (MSSQL, PostgreSQL)
- Page Object Model (POM)
- Cucumber BDD
- Mocha
- Azure DevOps
- Jenkins, GitHub Actions
- Gen AI Tools, AI Agent
- Maven
- Agile

Professional Experience

Cyrino | QA Automation Engineer | Mar 2025 – Present | 1.2 Year

- Performing end-to-end testing for web applications.
- Designed and developed automation framework using Playwright with TypeScript and Mocha for scalable UI testing.
- Performed end-to-end manual testing of onboarding workflows including employee onboarding, leave management, and payroll modules.
- Analyzed user stories and acceptance criteria to create detailed test scenarios and test cases.
- Executed regression, smoke, and sanity testing for multiple releases.
- Conducted exploratory testing to identify edge cases and usability issues.
- Validated API request and response data using Postman and integrated API checks within UI automation.
- Logged and tracked defects in Azure DevOps and coordinated with developers for resolution.
- Automated critical workflows including form validation and business rule validation using POM design pattern.
- Contributed to CI/CD pipeline execution for automated test runs.

ABN Consultancy Service | Test Engineer | Dec 2022 – Feb 2025 |2 Year

- Reviewed Software Requirement Specifications (SRS) and created test scenarios based on business requirements.
- Designed and executed test cases for web and mobile applications.
- Performed functional, regression, smoke, and sanity testing.
- Conducted API testing using Postman and REST Assured for CRUD operations.
- Developed automation scripts using Selenium WebDriver with Java and Cucumber BDD framework.
- Built reusable automation components to improve maintainability and efficiency.
- Performed database validation using MSSQL and PostgreSQL.
- Verified bug fixes and performed retesting.
- Worked on Azure server hosting, application restore, and CI/CD pipelines.
- Collaborated with cross-functional teams in Agile and Waterfall environments.

Projects

CEC – Onboarding Workflow Platform

- Tested onboarding workflows including employee and school onboarding, leave management, and payroll processing.
- Performed both manual and automation testing to ensure application stability.
- Automated key workflows using Playwright with TypeScript and Mocha.

Uniform & Laundry Management System – We One

- Validated uniform management workflows and API integrations.
- Ensured accurate employee and inventory data synchronization.

Warehouse Management System – Al Fahim and Makita

- Conducted functional and regression testing for warehouse operations.
- Performed API and database validation to ensure data consistency.

Education

- **Bachelor of Engineering** – Jeppiaar Maamallan Engineering College-2020
- **12th** – Dhanalakshmi Srinivasan Matric Higher Secondary School -2016
- **10th** – Dhanalakshmi Srinivasan Matric Higher Secondary School -2014
